Step 2: Install Viva Wallet Smart Checkout module	.13
Upgrading the plugin	.14

Before you start

Before you attempt to install the Viva Wallet Smart Checkout module for PrestaShop, check

that your hosting provider supports the following:

- PHP version 7.1 or later
- PHP extensions: cURL, JSON
- TLS 1.2 or later

Step 1: Create Viva Wallet account

If you do not already have an account with Viva Wallet please create an account.

- <u>Sandbox/demo account</u>, for testing purposes.
- <u>Production/live account</u>, for payments in the real world.

Step 2: Generate PrestaShop credentials

- Log in to Viva Wallet, <u>demo</u> or <u>live</u>, and select the required account.
- Go to Settings > API Access and scroll down to the PrestaShop Credentials section:

• To generate your PrestaShop account credentials, click on the Generate a pair of credentials button:

PrestaShop Credentials	
Client ID	a2f5aycugkehc3weje38dlzyucnjm8ta03z6h6av2bnt4.apps.vivapayments.com
Client secret	k47b3p5K7ZjnDaGcH3cmX63b1Ga5GM

• Note these values for future use

If you forget the Client secret, you can generate a new one clicking on the 'Forget your secret? Generate a new one' button.

Step 3: Add your brand logo

We would highly recommend you show your company logo on your payment pages in order to increase customer recognition and trust, thus improving conversion. You can insert your company logo while creating the payment source as outlined above.

You can also change or update this logo at any time. To do this, please see our <u>adding your brand</u> <u>logo</u> tutorial for a step-by-step guide.

Step 4: Determine your payment methods

Determine which <u>payment methods</u> you want to offer to your customers.

Some of these payment methods are automatically enabled for you by us (e.g. Apple Pay), other payment methods can only be enabled by yourself (e.g. PayPal), for others you need to get in touch with us to enable them for you after a further review of your business.

Setup instructions

Step 1: Add "Viva Wallet Smart Checkout" module to your PrestaShop store

5. Within the **Settings** panel, fill in the following fields:

🗱 SETTINGS		
Enable Demo Mode	YES NO If Demo Mode is enabled, please use the credentials you got from	n demo.vivapayments.com.
Demo Client ID	abcdef123456.apps.vivapayments.com	
Demo Client Secret	A1b2C3d4E5f6 Client Secret provided by Viva Wallet.	
Demo Source Code List	2468 ~ Provides a list with all source codes that are set in your Viva Wal banking app.	llet
Title	Viva Wallet Smart Checkout This controls the title which the user sees on checkout page.	
Description	Pay using 30+ methods (cards, digital wallets This controls the description which the user sees on checkout page.	
Order status after successful payment.	Paid through Viva Wallet Order status to set when the payment is completed and order is created	
Installments	90:3,180:6 WARNING: Only available to Greek Viva Wallet accounts. Example: 90:3,180:6 Order total 90 Euros -> allow 0 and 3 installments Order total 180 Euros -> allow 0, 3 and 6 installments Leave empty in case you do not want to offer installments.	

- o Enable Demo Mode: Choose whether you are using a demo or live account
- **Client ID / Demo Client ID**: Enter the Client ID you noted in *Step 2: Generate PrestaShop* credentials
- **Client Secret / Demo Client Secret**: Enter the Client Secret you noted in *Step 2: Generate PrestaShop credentials*

- Source Code List / Demo Source Code List: This will populate automatically when save the page. Normally, you will only have one Source for PrestaShop and so can ignore this field, but if you have multiple you can select one here
- Title: Enter an optional title to display to customers on the Checkout screen
- Description: Enter an optional description to display to customers on the Checkout screen
- Order status after successful payment: Choose what to set your order status to, within PrestaShop, when the payment is successful
- **Installments**: This is an optional field, only applicable to Greek merchants you can set the maximum allowed payment card installments and their corresponding order values.
- 6. When complete, click on the **Save** button at the bottom-right and the Viva Wallet payment option will be available in your checkout.

After the successful configuration, please verify the format of the following URLs:

Redirect URLs:

https://www.yourdomain.com/module/vivawalletsmartcheckout/success?environment={\$environm ent}

https://www.yourdomain.com/module/vivawalletsmartcheckout/failure?environment={\$environm ent}

Webhook URL:

https://www.yourdomain.com/module/vivawalletsmartcheckout/webhook?environment={\$environ ment}

where {\$envrironment} = demo or live

<u>Note</u>: You do not need to set up a webhook for the PrestaShop Smart Checkout plugin, as this is automatically managed by the plugin.

Multistore setup instructions

Viva Wallet's Prestashop Smart Checkout plugin is compatible with PrestaShop's Multistore feature, which allows merchants to manage multiple e-shops with one Back Office. To enable Multistore functionality, please follow the below steps:

Step 1: Add new Shop

1. Enable the multistore option from **Shop parameters > General**:

PrestaShop 1228	Quick Access + Q, Score	ch (e.g.: product exprenses, austorn)		🕢 All shops 🔻	, <mark>@</mark>
«	General				
🛹 Dashboard	Preferences				
	General Maintenance				
SELL					
🛨 Orders		🔅 General			
Gatolog					
Customers		Enable SS.	Please click here to check if your shop supports HTIPS.		
Customer Service					
n. Stats		Enable SSL on all pages	NO. YES		
			When enabled, all the pages of your shop will be SSE secured.		
IMPROVE		Increase front office security	ind YES		
A Modules			Enable or disable taken in the Frenc Office to improve PrestaShog's security.		
🖵 Design		Allow itrames on HTML fields	NO TO		
💭 Shipping			Allow itemes on text fields like product description. We recommend that you leave this option disabled.		
Payment					
International		Use HTMLPuritier Library	Geen the ITML content on text fields. We recommend that you leave this option snabled.		
CONHIGURE		Round mode	Round up away from zero, when it is half way there (recommended)		
🔅 Shop Parameters 🗠			You can choose among 6 different ways of rounding prices. "Round up away from zero" is the recommended behavior.		
General		Round type	Round on each line		
Order Settings			You can choose when in mund prices either on each mens, each line or the total (of an invoice, for example).		
Product Settings		Direl scenarios	NO 035-		
Costoner secongs Contact		Costing, Solitaria 3	Enable suppliers page on your front office even when its module is disabled.		
Traffic & SEO

Upgrading the plugin

Keeping the plugin up to date help improve user experience with the addition of new features as well as improvement of existing features.

1. To find the existing version of the plugin, log in to your PreastaShop admin panel, go to module manager and search for Viva Wallet. Notice the version of the plugin.

2.	If Upgrade	button	is visible.	click it to	upgrade th	ne plugin.
